

Advancing Blockchain Technology Through Governance

Miami, FL, 2018.01.20

Introduction

Marco Peereboom

- Decred New Systems Development
- CTO of Company 0 LLC

Governance ZZZ

Governance?

BOOORING!!!

What is Decred?

- **Digital autonomous currency**
- **Created to address a crisis of governance in Bitcoin**
- **Puts Decred holders in charge of governance, not miners or developers**
- **Governance system is opt-in and uses Proof-of-Stake**

Decred features

- **Self sustained**
- **PoW/PoS hybrid consensus**
- **Staking and Voting**
- **Tension and incentives**
- **Forefront of innovation**

Decred highlights

- **Recent innovations:**
 - On-chain voting
 - Lightning Network
 - Cross-chain atomic swaps
- **Future:**
 - Politeia platform
 - Mobile
 - Enhanced user privacy
 - Convert Decred to DAE (or DAO)

Decred governance

- **Dispute resolution**
- **Future proofing and scalability**
- **Censorship resistant voting**

Decred governance tiers

- **Two-tiered proposal & voting system**
- **Tier 1 on-chain voting**
- **Tier 2 off-chain proposal**

Decred governance Tier 1

- Tier 1 is an on-chain vote
- Binding via dormant code
- Controlled hard-fork
- Used to implement consensus and protocol changes
- Enables Decred to scale into the future
- Future proofing

Decred governance Tier 2

- **Tier-2 off-chain community proposals**
- **Binding via on-chain anchoring**
- **Feature requests**
- **Disbursement schedule**
- **Non-technical use of development funds**

Interrogative

Questions?

Thanks!
